WELL CELL® WISHES YOU ALL A MERRY CHRISTMAS AND THE BEST YEAR OF ALL FOR 2025!

URGENT!

Please see our November newsletter. We would appreciate your sending us any before-and-after photos you have of wound improvement following treatment with PIR. Please send them to carol@wellcellsupport.com, and if you have questions, call Carol at **(281) 713-5999 x112**.

NEW PUBLISHED STUDY IN THE WORKS

Well Cell is excited about the improvements experienced by kidney patients under the care of **Dr. Roy Hinman** at **Island Doctors** in St. Augustine, Florida. The results are featured in articles previously posted (wellcellglobal.com), and in an updated article currently in preparation.

The data shows **Chronic Kidney Disease (CKD)** patients Stages 4 and 5 who DID NOT receive PIR worsened by either progressing to dialysis or dying, while patients at the same stages who received PIR significantly did NOT progress to dialysis and NONE of them died. This is an extremely important set of data that will be published soon, and the cost saving to Medicare and other insurers is monumental. We will let you know when the new study has been published.

SEE YOU IN 2025!
