## **NEXT GEN PIR NEW PUMP DEPLOYMENT!**

PIR is an evolving standard owned and defined by Well Cell. Examples of this evolution include R&D programs with leading universities, a suite of newly pending patents and trade secret protections, and the launch of **Next Gen PIR!**

For some time, Well Cell has been working with, investigating, and testing pumps that physicians can use to implement the PIR treatment process. Well Cell's previous pump manufacturer notified us that they intended to do a "Voluntary product removal" of their pump. This voluntary removal was subsequently reclassified as a "Voluntary class 1 recall." Accordingly, Well Cell moved up its timeline to deploy Next Gen PIR. It selected a new approved pump and an alternate from two different manufacturers. The improvement in the new primary pump is substantial, and we are referring to this iteration as **Next Gen PIR.**

Next Gen PIR includes the transition to a cloud-based paperless environment and an unrivaled, state-of-the-art pump—improving the cost and efficiency of clinics deploying Next Gen PIR. The transition to Next Gen PIR permits continued use of your current device, based on your physician's determination not to disrupt essential care, until it reaches its end of life. All devices will need to be transitioned at that point, and updated license agreements will be forthcoming to facilitate this exciting jump forward!

Our legacy pump manufacturer will continue supporting the infusion cassettes until **June 20, 2024.** If you are interested in transitioning to Next Gen PIR prior to your devices reaching their end of life, please contact us at your earliest convenience for scheduling at **support@wellcellsupport.com.** The Next Gen PIR was selected with a focus on ease of use and accuracy.

For additional information, contact **Glenn Massey** at [glenn@wellcellglobal.com](mailto:glenn@wellcellglobal.com) or (713) **582-0449**.

Since 2015, Well Cell's goal has been to enable physicians to help their patients with diabetes and other metabolic disorders. We are grateful that you share that goal. We urge you to prioritize this transition to avoid any lack of access to Next Gen PIR as we move into the next phase of providing physicians with powerful tools.

**REMINDER OF NEWLY PUBLISHED ARTICLES ABOUT PIR**

We are in the process of updating our websites and making changes that we will also be asking you to make at your sites to avoid making any “claims” as defined by the FDA. However, we are regularly updating our **Published Articles** page and encourage you to review them and make them available to your physicians and other professional contacts. In addition, we encourage you to refer to that information and reference the articles at your website with a page for such medical and scientific information. This information is intended to enhance the physician’s understanding of patient needs to enable improved outcomes.

Find our **Published Articles** page by clicking [here](#).
